PROFESSIONAL SUMMARY

Senior multi-asset investment professional with 10+ years across portfolio construction, risk analytics, strategic asset allocation and quantitative research at leading Canadian asset managers. Experienced in evaluating portfolio exposures, diversification, concentration and correlation structure; reconciling views across internal and external strategies within a consistent relative-value framework; and distilling complex quantitative and qualitative information into decision-useful recommendations for portfolio managers, investment committees and executives. Led a specialized analytics team and mentored junior analysts. CFA charterholder with dual master's degrees, deep fluency in Python, SQL and advanced Excel, and hands-on experience building AI/ML-enabled research tools.

CORE COMPETENCIES

- **Portfolio Construction & Risk:** Exposure, concentration & correlation analysis · diversification & scalability assessment · VaR, drawdown & historical scenario analysis · exposure/limit & P&L monitoring · performance attribution · portfolio optimization
- **Investment Strategy:** Strategic & tactical asset allocation · capital market assumptions & return forecasting · relative-value and capital-allocation frameworks · assessment of market & investment developments and their portfolio implications
- **Quantitative Research:** Factor modeling · time-series forecasting & nowcasting · PCA / dimensionality reduction · derivatives back-testing · machine learning models (linear, non-linear)
- **Communication & Leadership:** Investment-committee & executive-level materials · cross-functional stakeholder management · workstream leadership · coaching and mentoring junior colleagues
- **Technical:** Python · SQL · VBA · advanced Excel & PowerPoint · AI/ML-enabled research tooling · back-testing & optimization software

PROFESSIONAL EXPERIENCE

CI GAM – Multi-Asset Management Group

Toronto, Canada

Senior Research Analyst

2022 - Now

- Lead strategic asset allocation research across equities, currencies and private assets, forming the analytical foundation for multi-mandate portfolio construction and capital-allocation decisions
- Reconcile internal portfolio manager views with externally managed strategies and third-party data sources through a consistent framework, maintaining coherent allocation across mandates
- Translate complex quantitative work into concise, decision-useful materials and recommendations for portfolio managers and senior leadership
- Architected a 4-pillar factor model (fundamentals, valuation, liquidity, technicals) to assess exposures and relative value across asset classes; applied PCA to large time-series datasets to isolate common drivers, correlation structure and concentration risk
- Developed forecasting and nowcasting frameworks and analytical dashboards across equities, currencies, commodities and alternatives to guide allocation and identify emerging market developments
- Led a 3-person machine-learning team building a news-sentiment time-series signal, coaching team members on research design and model validation
- Designed a self-adjusting regression framework reconciling expected versus realized returns, sharpening capital market assumptions used in allocation
- Built an end-to-end PMI forecasting pipeline screening 100,000+ variables; engineered AI-driven currency forecasts (linear, LSTM, XGBoost, Random Forest)
- Programmed S&P 500 options back-testing to optimize strike selection for spread-selling overlays
- Restructured research data architecture into a centralized, scalable SQL platform, improving the timeliness and reliability of portfolio analytics

Proprietary Investment Fund (VCMGAM Hedge Fund) – Multi-Asset Strategies

Toronto, Canada

Quantitative Researcher

2020 - 2022

- Implemented VaR, drawdown and historical scenario analytics and delivered segmented performance insights and risk-remediation plans to portfolio management
- Engineered Python reporting for exposures, limits and P&L oversight across multi-asset strategies
- Designed systematic strategies leveraging PCA, mean reversion and stochastic processes; integrated alternative datasets (news/sentiment) to enhance forecasting

PROFESSIONAL EXPERIENCE - Continued

RBC Global Asset Management

Toronto, Canada

Analyst, Fixed Income and Currencies

2017 – 2019

- Produced real-time risk and liquidity analytics and desk dashboards (carry, FX models, attribution) supporting portfolio manager decisions
- Operationalized market assumptions into executable tilts and hedges in partnership with PMs, research and risk/analytics teams
- Prepared concise market and portfolio updates for desk heads; improved the standardization and timeliness of desk communications

Securities & Investment Management Association (formerly IFIC)

Toronto, Canada

Senior Analyst, Research and Statistics

2015 – 2017

- Advised leadership and external stakeholders on industry KPI drivers; presented methods and insights to senior stakeholders
- Owned industry dashboards and mutual fund trend analytics; directed data governance and automated reporting pipelines
- Mentored junior analysts and elevated team analytical standards

Sea Breeze Power Corporation

Vancouver, Canada

Energy Economist

2012 – 2015

- Built valuation models (DCF, Monte Carlo, optimization) and board-ready investment cases for renewable projects
- Developed predictive time-series models for natural gas and power prices; contributed scenario analysis across the development pipeline

South Pole Corporation

Zurich, Switzerland

4-months Internship in project management

2011

EDUCATION AND CREDENTIALS

- **CFA Charterholder** — CFA Institute 2017
- **Master of Arts (MA), Economics** — Simon Fraser University 2012
- **Master of Science (MSc), Energy Science & Technology** — ETH Zurich 2011
- **Bachelor of Science (BSc), Mechanical Engineering** — University of Tehran 2008

SELECTED TECHNICAL TRAINING

- **Quantitative Finance:** Portfolio Construction & Analysis with Python (Intro & Advanced) · PCA for trade structuring · stochastic models (Ornstein–Uhlenbeck, Vasicek) · relative-value & mean-reversion modeling
- **Machine Learning & Data:** Neural Networks & Deep Learning, Hyperparameter Tuning, Structuring ML Projects (DeepLearning.ai) · Applied ML in Python (U. Michigan) · Databases & SQL (IBM)

ACHIEVEMENTS

- Ranked 407 out of 0.5 million participants (99.9 percentile) in national entrance exam for universities in Iran
- Graduate of the National Organization for Development of Exceptional Talents (NODET) in Iran

INTERESTS

- Competitive basketball player (former varsity athlete)
- Intellectual podcasts in economics, science, philosophy & history
